Blackjack is a relatively simple game, but it's still good to learn more about it and study the rules before playing, even if only for fun.

Each card has a certain value:

Ace has a value of 1 or 11.

The objective of each game round is to obtain a hand that's higher in value

than dealer's hand, without exceeding the value of 21. If you don't bust, it's the dealer's turn.

Practice Blackjack basic strategy before playing for real money

The most widely spread side bet is called "21+3", in which you can win

a certain multiple of money placed on this bet, depending on your two cards and the dealer's "upcard" (the visible card).

They all have an RTP that's worse than the RTP of Blackjack played without

side bets.

The next day I realized DraftKings had gone back and actually taken the money a

way.

I usually wager between \$10-\$30, nothing crazy.

Instead of hitting 30, I accidentally hit the +100 above the 3, and the 8 instead of the 0.

I have never come close to betting anything like this and I immediately panicked.
